West Cross Street Improvements Project City of Ypsilanti

As part of the ongoing dedication to provide top quality, cost effective, and environmentally safe water and wastewater services to our customers, YCUA will be making improvements to both existing water and wastewater utilities within West Cross Street between North Huron Street and Summit Street in the City of Ypsilanti. The improvements will be constructed for YCUA by V.I.L. Construction, Inc., of Sterling Heights, Michigan, and will be completed this coming summer between the Memorial Day and Labor Day holidays. Following completion of YCUA's utility improvements, the road will be resurfaced by the Michigan Department of Transportation under a separate construction contract.

The project was designed for YCUA by OHM Advisors, Inc., of Livonia, Michigan. On behalf of YCUA, OHM will also be administering the construction contract and providing full-time, on-site observation of the work by V.I.L. Construction, Inc.

Construction activities within the project limits will be confined to impact no more than four blocks of West Cross Street at any given time. On-street parking and sidewalk on one side of the street will be unavailable at times in each four block segment of the work. At least one lane of westbound traffic on West Cross Street will be maintained at all times except for a one week complete closure of the intersection of West Cross Street and North Hamilton Street. During that closure, traffic on both West Cross Street and North Hamilton Street will be detoured.

Access to homes and businesses within the project limits will be maintained at all times during the project. Although every effort will be made to minimize disruptions caused by the water and wastewater system improvements, the construction work will invariably result in some inconveniences. More detailed information will be provided closer to the start of construction and will continue during the course of the project. If you have any questions regarding this project please call YCUA at 734-484-4600 and ask for Scott Westover, Engineering Manager, at extension 220 or via electronic mail at swestover@ycua.org.
