West Cross Street Water Supply Improvements Construction Update June 23, 2021

The Ypsilanti Community Utilities Authority (YCUA) is in the process of making improvements to the water supply system along West Cross Street from North Huron Street to North Summit Street. OHM Advisors is the engineering firm and VIL Construction, Inc is the contractor performing the work on behalf of YCUA. The project is progressing quickly and entering into a new phase of construction.

On Friday, June 25th, the travel lane for all traffic along West Cross Street will be shifted from the south side to the north side. Traffic turning off Huron Street onto West Cross will be traveling in the right lane. **Parking will not be allowed on West Cross Street; those who park on West Cross Street may be ticketed and/or towed.** We kindly ask that you and your visitors park on the side streets or parking lots, and do not park on West Cross Street. Several signed 15-minute pickup/dropoff spaces will be provided on side streets as well, and residential permit parking is not being enforced for the first block north and south of West Cross Street during construction. During this phase of construction, there will be construction equipment on both sides of traffic at the same time with the Contractor often working on the north side and the south side simultaneously.

There will be water shut offs to perform the upcoming work. All water shut offs will be communicated in advance and written notice provided 24 hours before any planned water shut offs. Emergencies can occur that require the water to be shut off without warning.

There is an informational prerecorded meeting located here for review and more information about the Project. Part one - https://youtu.be/Zfk49__5Vhs ; Part two - <https://youtu.be/I-c9IKu9Cw>

If someone from YCUA or OHM contacts you at your address, the person will be able to provide identification of who they are, business cards matching their identification and a clear explanation of who they are or what they are doing. Please contact us at any of the numbers below for confirmation of identification or answers to any questions.

If there are special considerations we need to be aware of, please let us know. We realize this will be an inconvenience and we will do our best to minimize the impact of construction. Your patience through this process is much appreciated. Thank you.
