Water System Advisory Council Openings

The Ypsilanti Community Utilities Authority (YCUA) is looking to fill two (2) positions on our Water System Advisory Council. The purpose of the Council is to develop plans for continuing public awareness about lead in drinking water, consult on public education if a lead action level is exceeded, advise on efforts to replace private lead services, assist in promoting transparency of all data, and collaborate with local groups to ensure residents can be involved in efforts to educate the community about lead in drinking water. Prospective members shall reside in the City or Charter Township of Ypsilanti and shall not formally represent the interest of any incorporated organization. The Council meets at minimum twice per year or more often if deemed necessary.

Interested applicants should reach out to Luther Blackburn, YCUA's Executive Director via email at lblackburn@ycua.org or by phone at 734-484-4600 Ext.116.
